Relevant Classes: Intro to Web Publishing, Computer Applications

St. Clair Technical Education Center   2012-2014
Information Technology Program: Hardware identification, Windows OS management, basic network management and configuration, command prompt navigation, overall troubleshooting, and diagnostic skills.

SKILLS

I adapt to programs and programming libraries swiftly and I am able to solve most problems with Google. Java, C#, C, JavaScript, and Shell are my practiced languages. Source control systems such as Git and SVN have been practiced through various personal and professional projects. I have some years of personal and professional experience maintaining operating systems including Windows (XP and up), Linux (Many Distributions), and MacOS. Experience and training in industry allow me to troubleshoot and solve issues swiftly by utilizing my resources.

ACCOMPLISHMENTS

National Honor Society (NHS) in 2012
Participated in the state SkillsUSA IT 2013 competition
Placed second in the regional SkillsUSA IT 2013 competition
Placed first in the local SkillsUSA IT 2013 competition
Placed in the State CyberPatriot Security competition 2014

CERTIFICATIONS

CompTIA A+ Certification 801,802
Network + Certification
Strata Certification
TestOut PC Pro Certification
TestOut Net Pro Certification

INTERESTS

During my free time I enjoy researching, maintaining, and keeping up to date with computer technologies, light video/music editing and production, development (HTML/CSS, Java, others), and running. I also have a GitHub account located at https://github.com/cephalization that is seeing more use as of late, as I practice my development skills on mostly web based projects that utilize endpoints of various web APIs (Spotify, YouTube).
